Art Unit: 3744

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 8, 9, and 15 are rejected under 35 U.S.C. 103(a) as being unpatentable over the admitted prior art in view of Shibamoto et al. The admitted prior art of Fig. 1 discloses the claimed invention except for the pressure reducing unit. Shibamoto et al teaches a refrigeration system with a bypass pipe and a pressure reducing unit 17 in the pipe. It would be obvious to provide the admitted prior art of Fig. 1 with a pressure reducing unit in the bypass pipe 14b, in view of Shibamoto et al, for the purpose of ensuring that only gaseous refrigerant flows through the bypass pipe.

3. Claims 1-7 and 10-14 are allowed.

4. Figure 1 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.121(d)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
